

ARCHITECTURAL  
CONCRETE  
TILES

**EXPOSE CONCRETE**  
**ARCHITECTURAL CONCRETE TILES**  
**UNPARALLELED IN DESIGN**

---

ALL EXPOSE TILES ARE HANDMADE. EACH PROTOTYPE IS SHAPED IN METAL BY A SCULPTOR BEFORE BEING MOULDED MANUALLY. EACH STEP OF THE PROCESS IS BEING CAREFULLY CRAFTED BY HAND & WATCHED OVER BY ATTENTIVE EYES. FROM THE VERY BEGINNING UNTIL PACKAGING AT LEAST 10 PAIRS OF CARING HANDS ARE TAKING PART IN THE PROCESS OF MOULDING, GRINDING, SELECTING & TREATING THE TILES BEFORE THEY GET TO LEAVE OUR MANUFACTORY.

**Papuma** is a concrete floor and wall covering fostered from a traditional motive. Made from fiber reinforced high performance EXPOSE concrete, these tiles are available both for exterior and interior usage. Papuma comes in three different thicknesses, therefore it can be applied for floors, walls or for heavy traffic. The contemporary use of the material, the custom colour of the product and the variation of small and large modules give endless possibilities for the user to create a unique surface.

# PAPUMA

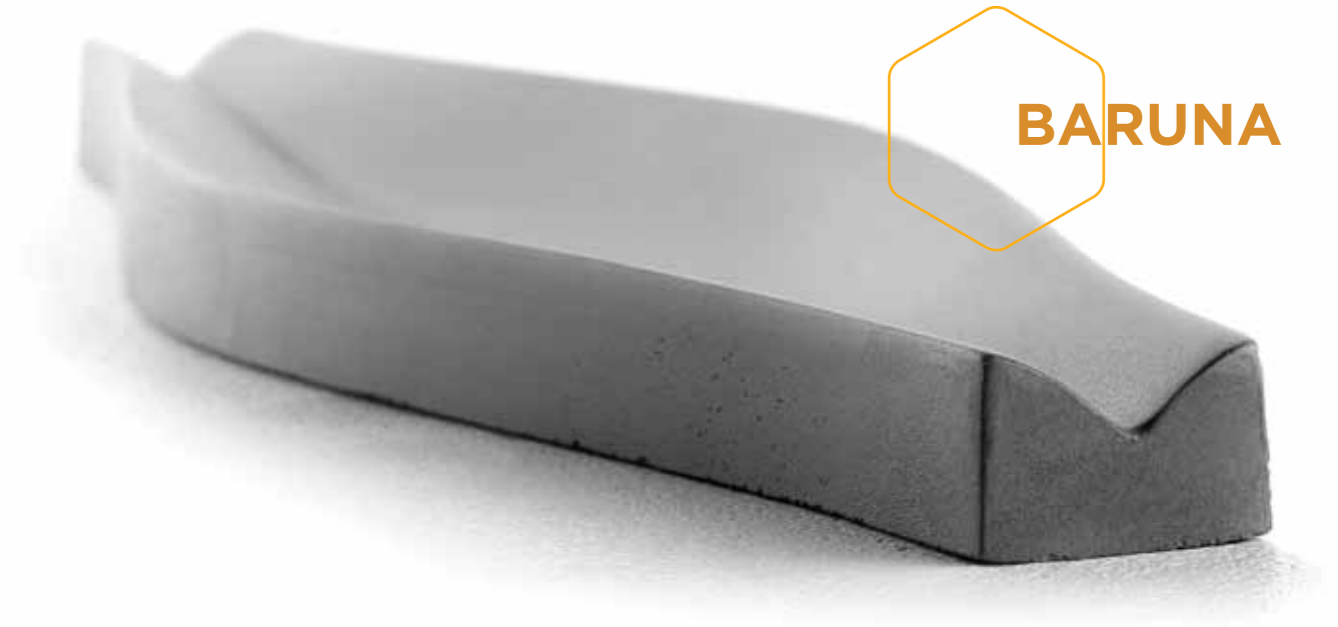

**Nature** always gets it right and the Baruna 3D Concrete Tile is following its lead with a flowing design inspired by moving water reimagined into a 3D wave wall. The sculptural wall tiles seem to spar with geometry while bending and manipulating light into individual tiles that work effortlessly together to create uninterrupted dimensional surfaces that are boundless.

Baruna is the perfect choice for use around livingroom, feature walls, outdoors, in damp areas & commercial spaces where durability is a priority.

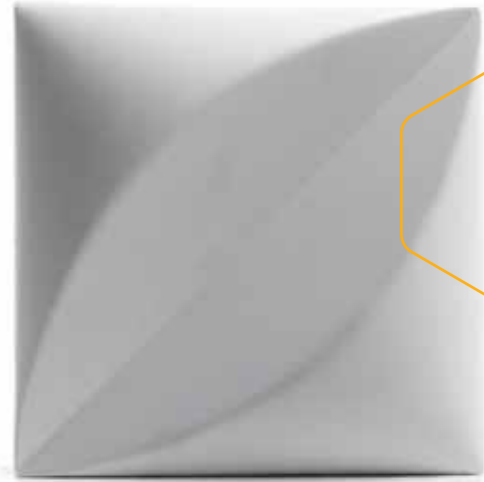

**Capturing** the magic of the toy we all loved as kids the Adonara 3D Concrete Sculptural Tiles mimic the interaction of pattern and shape creating a living wall that seems to move and change right in front of your eyes. The contextual design takes its cues from its environment offering up modular tiles that work effortlessly together to create an uninterrupted dimensional surface that are boundless.

Adonara is the perfect choice for use around livingroom, feature walls, outdoors, in damp areas & commercial spaces where durability is a priority.

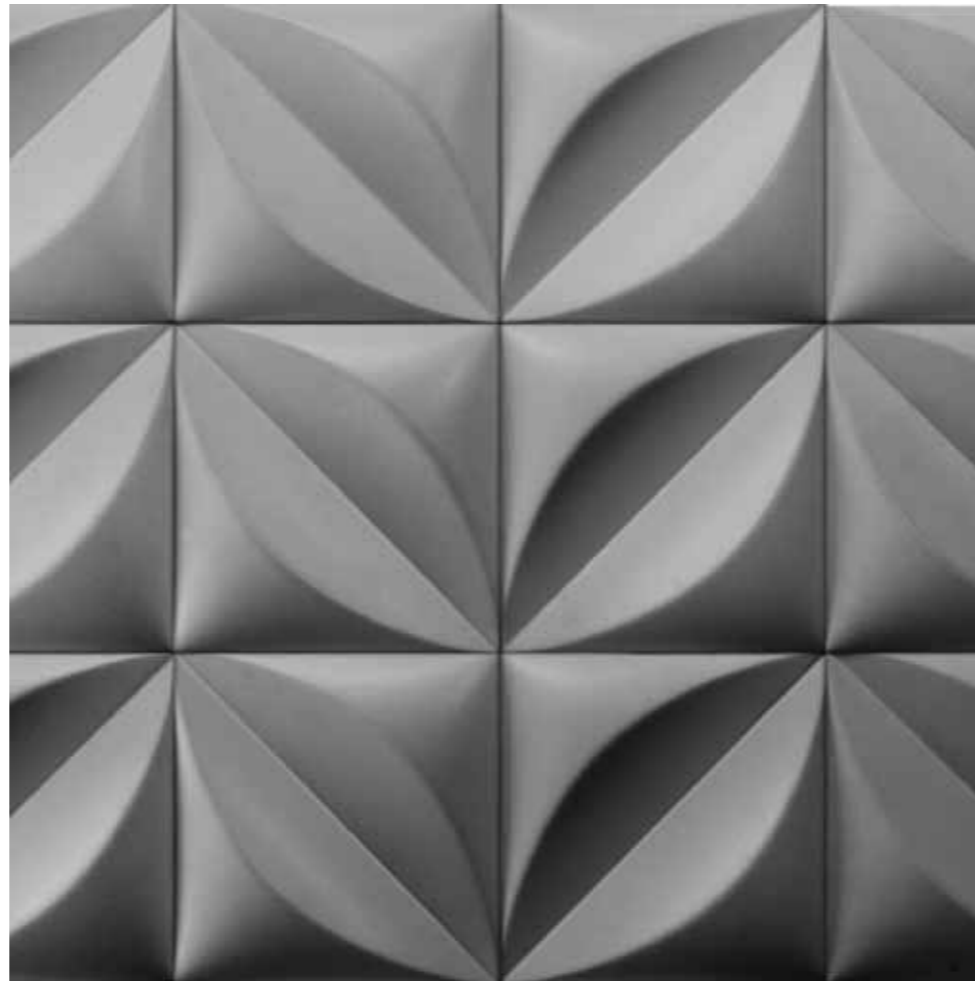

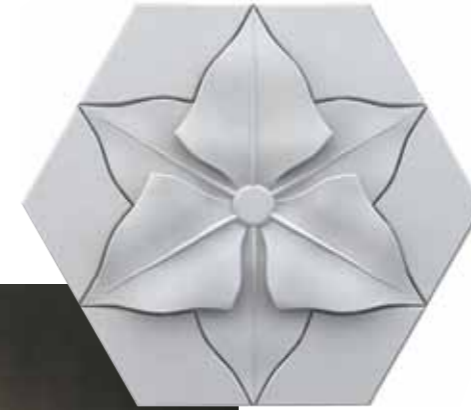

## SEBATIK

**Symbolic** of the protective environment caring for the caterpillar before it reemerges a beautiful butterfly the Sebatik 3D concrete wall tiles are caught between hibernation and bloom. The carved-out pedal seems to ignite thoughts of Spring or rebirth and the shape can be positioned three different ways creating completely unique looks that work effortlessly together to create uninterrupted dimensional surfaces that are boundless.

Sebatik is the perfect choice for use around livingroom, feature walls, indoor or outdoors, in damp areas & commercial spaces where durability is a priority.

SENTE

**This** tile design is born from a passion for gardening. The study of horticulture and a fascination for plant life from aesthetic and botanical perspectives and in microscopic detail to create SENTE.

Conversely, another source of inspiration is the drama and diversity of flora in the exuberant fabrics and wallpapers of the 3D Concrete Tile, like a leaf, down a high wall and like the vines and disappear beyond reach.

## DIAMOND

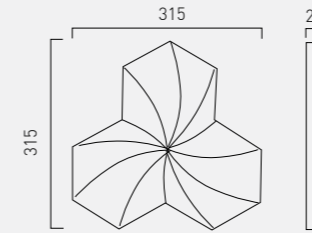

**Enjoy** the organic subtleties of concrete with this precast ready to install tile. Urban Concrete is designed and manufactured to bring a natural feel with modern simplicity and classic, timeless beauty to any area. To achieve this, the tiles have natural variation and random shading in every piece and box; these are characteristics of concrete tiles made with cement. The varying shades, color, pattern, and slight size differences enhance the natural look and feel of concrete tiles installed to any area. Urban Concrete stimulates versatility by offering unique 2D shapes for floors and walls.

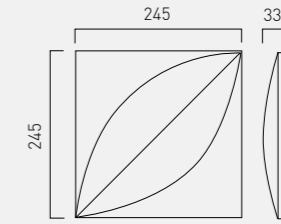

Diamond is the perfect choice for use around livingroom, feature walls, outdoors, in damp areas & commercial spaces where durability is a priority.

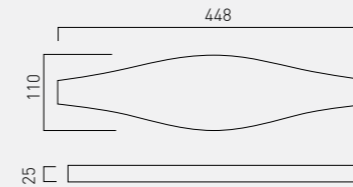

## INDEX

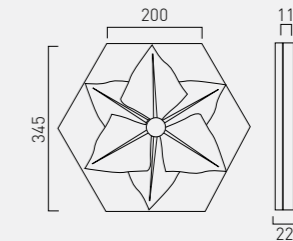

dimensions : 315 × 315 × 25 mm

 suitability : interior / exterior use for walls

EXPOSE-High performance concrete - reinforced with high density fiber, surface protected for water and stain resistance. The concrete produced by EXPOSE is an extremely persistent and resistant material, suitable for indoors and outdoors, domestic and public use.

Concrete is a breathing material with all its inhomogenous surfaces and cloudy appearances and we love it as such. Being a hygroscopic material moisture is being absorbed and released from concrete. The plays of color tone difference between each pigment-dyed plasters or even on one surface make it a living material completely different from dead and sterile plastic-kinds.

The aging of the concrete product you purchase is a natural and aesthetically pleasing characteristic that influences its appearance in a graceful compass.
